Art Unit: 3726

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18 and 53-58, drawn to a method, classified in class 29, subclass 527.2.
- II. Claims 19-52 and 59-62, drawn to an apparatus, classified in class 72, subclass 103.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and of Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method as claimed can be practiced by another and materially different apparatus such as one in which there is the roll is not arranged substantially perpendicular to the longitudinal direction of the workpiece..

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
